

Instructions for Tier 2 Public Notice

WHEN NOTICE MUST BE PROVIDED - Public water systems must provide the public notice as soon as practical, but no later than 30 days after the system learns of the violation. If the public notice is posted, the notice must remain in place for as long as the violation or situation persists, but in no case for less than seven days, even if the violation or situation is resolved.

CONTENT of the PUBLIC NOTICE - The following page entitled "Important Information about your Drinking Water" is a public notice template for your use. You may wish to modify it before using for radio or TV notice. If you do, you must include all required elements and leave the italicized health effects language unchanged. If you post or hand deliver, print your notice on letterhead, if available. Respond to all questions on the attach template and provide accurate contact information including name, address and phone number.

FORM and MANNER of PUBLIC NOTICE - Public notice for community water systems must, at a minimum, meet the following requirements:

- Mail, or other direct delivery, to each customer receiving a bill and to other service connections to which water is delivered by the public water system; **and**
- Any other method reasonably calculated to reach other persons regularly served by the system. Other method may include, but not limited to, newspaper publication, radio, posting notice in public places or the internet, delivery to community organizations.

SUBMIT DOCUMENTS TO DEQ - Submit to DEQ within 10 days of completing the public notification a representative copy of each type of notice made available to persons served by the system and the media. Include a certification that you have fully complied with the public notice requirements.

NOTICE TO NEW CUSTOMERS - Community water systems must give a copy of the most recent public notice for any continuing violation to all new billing units or new customers prior to or at the time service begins.

If you have any questions about performing public notice, please call DEQ first before sending the public notice to all of your customers. Please call **Emily Hoskin at 405-702-8171**.

Certification of Tier 2 Public Notice

Public Water System Name: Garvin County RWD #6 PWSID #: OK3002515 County: Garvin
For the following violation(s): HAA5 MCL TTHM MCL TOC TT PN Fourth Quarter 2023

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Our water system recently violated drinking water standards. Although this was not an emergency, as our customers, you have the right to know what happened, what you should do, and what we are doing to correct this situation.

Rural Water District No. 6, Garvin County Has Levels of Total Trihalomethanes (TTHMs) Above Drinking Water Standards

We routinely monitor for the presence of drinking water contaminants. Testing results we received for indicated time period(s) show that our system exceeds the standard, or maximum contaminant level (MCL), for total trihalomethanes. The standard or MCL for total trihalomethanes is 0.080 mg/l. It is determined by averaging all the samples collected at each sampling location for the past 12 months. The level of total trihalomethanes averaged at our system's location was the following:

Monitoring Location	Twelve-month time period	Locational RAA
TTHM_01 – 27253 N CR 3200	Fourth Quarter 2023	0.081 mg/l
Wynnewood, OK		

What should I do? There is nothing you need to do unless you have a severely compromised immune system, have an infant or are elderly. These people may be at increased risk and should seek advice about drinking water from their health care providers.

What does this mean?

This is not an emergency. If it had been, you would have been notified immediately. Some people who drink water containing trihalomethanes in excess on the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

CORRECTIVE ACTION

What Happened? What is being done? When will the violation be resolved?

The quality of water we purchase from the City of Wynnewood has secondary flocculation; the residue left from the chemicals used to treat the water. We have installed a device in our water tower to help with the secondary flocculation and will increase our flushing schedule. We have secured more water and are in the process of installing the remainder of the new water mainline so we can serve our whole district with our well water. Thank you for being patient as we strive to supply you with great quality water.

This notice is being sent to you by Rural Water District No. 6, Garvin County PWSID #OK3002515
NOV# P-3002515-24-1

Sincerely,

Tom Whitaker
Manager
